

DR — True Cloud Migration v1

DR · revision r2 · CONFIRMED · confirmed by trial at 2026-08-16T02:13:06.186709
project True Cloud Migration · generated 2026-08-16T02:13:06.547208+00:00 · baseline True Cloud Migration v2.0

1. Connectivity (private-only)

[dr_connectivity](#)

Migration traffic must use private connectivity only; public internet replication is not permitted.

1. Design Objectives

[dr_objectives](#)

Document the target-state design and migration approach for both tracks; private connectivity preferred.

2. Overall Architecture

[dr_overall](#)

AWS Landing Zone + Legacy Zone (Thailand Region) with hybrid/multi-cloud connectivity and a migration factory.

3. AWS Account / Landing Zone Design

[dr_accounts](#)

Account structure TBD (CLARIFICATION_REQUIRED); OU/account hierarchy to be confirmed.

4. Legacy Zone Design

[dr_legacy](#)

Legacy zone segmentation, security boundaries, routing — detail TBD.

5. Network Segmentation

[dr_network](#)

Segmentation per security boundary; CIDR ranges TBD (CLARIFICATION_REQUIRED).

6. Routing Design

[dr_routing](#)

Routing between zones, on-premises and cloud — TBD.

7. Security Boundaries

[dr_security](#)

Security controls, firewall/security controls design (vendor/model TBD).

8. Logging / Monitoring

[dr_logging](#)

Logging and monitoring design; toolset and retention TBD.

9. Governance Controls

[dr_governance](#)

Governance controls as part of landing zone design.

10. Active Directory Design

[dr_ad](#)

AD topology TBD (CLARIFICATION_REQUIRED).

11. DNS Design

[dr_dns](#)

DNS forwarding model TBD.

12. Firewall / Security Control Design

[dr_firewall](#)

Firewall/security controls design (vendor/model TBD).

13. Jump Host Design

[dr_jumphost](#)

Jump Host sizing TBD; migrated to AWS Cloud per SOW.

14. CyberArk Target Architecture

[dr_cyberark](#)

CyberArk target model and architecture TBD; migrated to AWS Cloud per SOW.

15. Hybrid Connectivity

[dr_hybrid](#)

AWS <-> on-premises, Direct Connect, AWS <-> Azure, AWS <-> GCP.

16. Direct Connect Design

[dr_dx](#)

Direct Connect topology and bandwidth TBD (CLARIFICATION_REQUIRED).

17. Azure / GCP Connectivity Considerations

[dr_azure_gcp](#)

Connectivity mechanism to Azure/GCP TBD.

18. Migration Factory Architecture

[dr_factory](#)

Staging subnet, routing, VPC endpoint architecture for mass migration.

19. Staging Subnet

[dr_staging](#)

Staging subnet design TBD.

20. VPC Endpoint / PrivateLink Design

[dr_endpoints](#)

PrivateLink endpoints for private-path replication.

21. Security Groups

[dr_sg](#)

Security groups for migration network foundation.

22. AWS MGN Design

[dr_mgn](#)

MGN replication agent enablement, DNS resolution, endpoint usage, agent installation.

23. Replication Flow

[dr_replication](#)

Private-path replication from source to target VPC via MGN.

24. Pilot Migration Flow

[dr_pilot](#)

Pilot migration test, verification and health confirmation.

25. Migration Wave Operating Model

[dr_waves](#)

Wave planning -> readiness -> replication -> test -> cutover -> validation -> closure.

26. Rollback / Verification Considerations

[dr_rollback](#)

Rollback criteria TBD.

27. Operational Handover

[dr_handover](#)

Runbooks and operational handover ownership TBD.

28. Traceability

[dr_trace](#)

Design sections trace to requirements and architecture/flow objects.

29. Assumptions

[dr_assumptions](#)

Private-path intent; Thailand Region target (labelled).

30. Open Decisions

[dr_decisions](#)

Documentation deliverables scope (design, not deployment implementation).

31. Open Clarifications

[dr_clarifications](#)

Account structure, CIDRs, DX bandwidth, pilot acceptance criteria, workload count.

Process flow summary

Flow	Step	Type
Migration Factory / Workload Migration Flow	Assessment	ACTION

Migration Factory / Workload Migration Flow	Prepare source	ACTION
Migration Factory / Workload Migration Flow	Install MGN agent	ACTION
Migration Factory / Workload Migration Flow	Private-path replication	SYSTEM
Migration Factory / Workload Migration Flow	Health verification	DECISION
Migration Factory / Workload Migration Flow	Test launch	ACTION
Migration Factory / Workload Migration Flow	Pilot verification	DECISION
Migration Factory / Workload Migration Flow	Cutover	APPROVAL
Migration Factory / Workload Migration Flow	Post-cutover validation	DECISION
Migration Factory / Workload Migration Flow	Handover	END
Migration Wave Operational Flow	Wave Planning	ACTION
Migration Wave Operational Flow	Readiness Check	DECISION
Migration Wave Operational Flow	Replication	SYSTEM
Migration Wave Operational Flow	Test	DECISION
Migration Wave Operational Flow	Approval	APPROVAL
Migration Wave Operational Flow	Cutover	ACTION
Migration Wave Operational Flow	Validation	DECISION
Migration Wave Operational Flow	Closure / Handover	END

Architecture summary

Diagram	Node	Type
Track 1 — Landing Zone	AWS Organization / Accounts	EXTERNAL_SYSTEM
Track 1 — Landing Zone	Landing Zone	CLOUD_SERVICE
